Trailhead Outfitters: Regional Sales 2025

Summary

Trailhead Outfitters sold 115,444 units across its 15 products and 6 regions in 2025. Trail Shoes was the best-selling product with 11,852 units, and Gaiters sold the fewest, with 2,985 units. Pacific was the strongest region with 29,305 units, ahead of Mountain with 21,677 units. The strongest quarter was Q4, with 36,978 units, and the weakest was Q1, with 20,461 units.

Online orders accounted for 31% of all units, up from 26% in 2024. The company ended the year with 74 stores across the six regions. The Pacific region operates 19 stores, more than any other region. The Midwest region has 14 stores, the Northeast 12, the Southeast 11, and the Mountain and Southwest regions 9 each.

Notes on the figures

Units are counted at the point of sale for stores and at the dispatch date for online orders. Returns are not deducted from the quarter in which the sale was recorded; they are reported separately in the finance pack.

The Mountain region covers Colorado, Utah and Wyoming. Figures for the Mountain region include the Boulder pop-up store, which traded from 1 June to 30 September 2025 and is not counted among the 9 permanent stores.

Camp Stove sales in the fourth quarter include a promotion that ran from 24 to 30 November 2025. Headlamp units combine the 350 lumen and 600 lumen models, which are reported as one product. Totals are the sum of the four quarters and are reconciled to the finance system every January.

Sales detail

Table 1: Units sold by product, region and quarter

Product	Region	Q1	Q2	Q3	Q4	Total
Trail Shoes	Northeast	368	508	547	563	1,986

Product managers should use Table 1 when setting purchase quantities for 2026. Questions about the figures can be sent to the sales operations team, who maintain the source data and publish a revised version if any totals change. The next regional report covers the first half of 2026 and will be published in August 2026.
